New Show!!!

Professor Winklebottom's OUR EARTH, WHAT A GAS!

Friday, June 18, 2010 at 6:30 pm
at the Pequest Trout Hatchery & Natural Resource Education Center

Follows the further adventures of Professor Winklebottom and Meatloaf at the next meeting of the Science Club as they examine the bubble of our atmosphere, the basics we need to survive in that bubble and the delicate cycles of the Carbon/Oxygen/Hydrogen exchange between the Plant and Animal Kingdoms. They then illustrate how wasted resources, litter and other pollution threaten that simple but delicate balance, trapping gasses and warming the Earth's atmosphere, and the simple ways we can all chip in to take care of Our Earth.

REGISTRATION IS REQUIRED

This program is appropriate for organized groups and the whole family.

For more information and to register, call (908) 637-4125.
